ENVIRONMENTAL AND ENERGY POLICY

Our company, which has the vision of "To be a strategic production partner of world brands in the ready-to-wear and home textile sector" and is aware of its social and environmental responsibilities, is committed to the followings;

To comply with the Turkish and international environmental and energy legislation in force and brand expectations for which it is responsible, from the design of all product and production stages to the end of the life cycle;

- ✦ To prevent environmental pollution, to ensure protection of the environment and to reduce pollution at its source,
- ✦ To carry out waste management in compliance with legal regulations and international standards,
- ✦ To ensure that all of the wastes are recycled or disposed of without harming the environment,
- ✦ To use chemicals that do not harm the ecological balance and comply with international standards,
- ✦ To support activities that promote the conservation of biodiversity and to contributing to the sustainability of natural habitats,
- ✦ To use energy, water and other natural resources efficiently, to increase the use of green energy,
- ✦ To raise awareness of employees and stakeholders on energy efficiency, water saving and environmental awareness, and to organize training programs to ensure that they are aware of their individual responsibilities in this regard,
- ✦ To provide the necessary resources by considering the environmental and energy factors in new investments in order to achieve the goals and targets,
- ✦ To continuously improve and review the environmental management system and energy performance in line with the targets,
- ✦ To share and disseminate the results of environmental and energy improvements with customers, suppliers, employees and the community.
